Devon Biofuels Ltd

Thursday 11th November

Open Day

Devon Biofuels Ltd – the future of biofuel in Devon

Devon Biofuels Ltd

Thursday 11th November 2010

Devon Biofuels Ltd has begun its commercial production of wood pellets at its base, Higher Sessland Farm, Spreyton in the heart of Devon. With its new sawdust drying equipment and pelletizer, Devon Biofuels can now produce high quality wood pellets for a variety of uses. Primarily wood pellets are used in biomass heating systems, from small domestic boilers to large site solutions. Alternatively wood pellets are used for cat litter and an alternative to wood shavings for horse bedding.

Devon Biofuels Ltd's wood pellets will be produced locally with the sawdust and shavings sourced from West Country sawmills and suppliers. Devon Biofuels Ltd are now looking to distribute their locally produced renewable fuel across the South West.

This Open Day is for those who have a serious interest in and a requirement for a wood pellet supply either now or in the future. General interest Open Days will be held on future dates.

Schedule

The day is divided into three slots, when you book a place you will be allocated one of these appointments.

- 10.00 – 12.00 – Slot 1 (15 people)
- 12.00 – 1.00 – *Lunch Break no visitors*

- 1.00 – 3.00 – Slot 2 (15 people)
- 3.00 – 5.00 – Slot 3 (15 people)

Each slot will include a presentation and tour of Devon Biofuels Ltd, including a practical demonstration of the new pelletizing equipment. Full details including costs; of the use and applications of different grades of pellets from biomass heating to animal bedding.
